

EasyCore 3.0 Beta Test Conditions of Use

August 23, 2022

The EasyCopy Company (TEC), as the developer of EasyCopy software products, hereby have made EasyCore 3.0 available for test in none production environments.

This is an addendum to the TEC general term and conditions.

The online help holds the product specifications for the products to be tested and is for some of the functionality still under construction.

The EasyCopy Company desires to complete the beta test as quickly and professionally as is feasible. To that end, TEC will make appropriate resources available for feedback and discussions 1 to 1.

Detailed description of problems and information relevant for the understanding and reproduction of the problem is requested via e-mail and/or online meetings.

The EasyCopy Company will endeavor to correct any level 1 and level 2 bugs. Decisions regarding priorities will remain with TEC. For example, correction of minor level 2 bugs or correction of time-consuming level 2 bugs may be delayed to a subsequent release.

Level 1 bug: Critical or Severe.

Example: User/administrators cannot use major product functions as described in documentation.

Level 2 bug: Annoying (real or potential work-around exists)

Example: An option is not saved and must always be set manually.

Level 3 bug: For the Sake of Perfection

Example: Misspelled word in Help text or Documentation, but not misleadingly.

During the course of the beta testing TEC may need access to files and/or projects to replicate the problems.

Beta Site agrees that information about the new release and test results cannot be distributed to third party without the consent of TEC.

As a direct outgrowth of the beta test, TEC actively solicits suggestions for inclusion in the release being tested as well as suggestions for later releases.

Areas in which reports and feedback are focused:

- EasyDB load and store and search
- SQL deployment
- 3.0 visualizations
- 3.0 data export
- 3.0 data import
- Customization
- Request for improvements 3.1
